Q: How can I invoke the default java jar classloader in eclipse? I have a Java program and some jars are made by other users. I need to invoke the default classloader of the JRE that is built into eclipse. Is it possible? A: You can start your program with -jar commandline option (otherwise all jars will be ignored) and also with JAR\_FILE commandline option. The JAR\_FILE can be a path to a file (or directory) with your jars. The classpath will be set to the default value. See the following link for more: -jar MyJar.jar Moyamoya Disease A
