## VRCP AutoKFD Full Version

VRCP AutoKFD is an easy-to-use application that can protect your PC against harmful drives and USB-connected devices, such as CD/DVD/Blu-Ray drives, scanners, hard drives, SD/USB/MMC memory cards, cameras, etc. This is an advanced and professional tool that is especially helpful for users that need to use their computers in public or to protect their valuable data from people who could try to access them. It provides a wide range of options that let you tailor its settings to your own preferences. In addition, it is able to remove all the data that could be potentially harmful from your devices, without any manual intervention. The latest versions of this application include improvements such as its ability to automatically remove infected files, a secure boot function that prevents others from accessing your computer, and a range of other new features. Greatly reduces the risk of accidents You can use VRCP AutoKFD in order to automatically remove potentially dangerous files from your removable storage drives and devices. You can choose which files or folders are excluded from deletion whenever a new device is detected. This application provides you with several tools that can help you make your work easier, such as the ability to set a master password that prevents other users from accessing its capabilities without your permission. Take care of your devices With the help of VRCP AutoKFD you can prevent the accidental deletion of files and folders that contain important information or valuable data. You can also protect your data from malicious files that might be contained in your removable devices. How to use VRCP AutoKFD? You need to install the program on your computer. Double-click VRCP AutoKFD to open the main window. Choose the drives that you want to protect from malicious files. You can specify the testing frequency and the content of the drives. You can add new drives to the list and toggle the option that prevents the deletion of files from the default drives. To remove all files from a drive, first select the drive and then press the Delete button. To remove a particular file or folder from a drive, first select the drive and then click on the corresponding icon in the left panel. To remove a single file from the drive, first select the drive and then click on the corresponding icon in the left panel. To remove all files from a drive except for a particular file, first select the drive and then click on the corresponding icon in the left panel. To prevent all the

## What's New in the VRCP AutoKFD?

VRCP AutoKFD is a freeware application that enables you to automatically remove potentially dangerous files from removable storage drives. You can use this software to scan your removable storage drives for potentially dangerous files and remove them from your hard drive. To remove these files from your removable storage drives, VRCP AutoKFD makes use of a variety of defined filters that automatically detect and remove file types. The first filter allows you to include or exclude file extensions like.rar,.exe, and.avi. The second filter lets you set a time frame in which the application should test each new drive. In addition to this, the option to toggle the removal of duplicate files is available. A list of excluded directories can also be created so as to include or exclude specific file paths. Lastly, the application supports an option that automatically removes certain files and folders on your hard drive. VRCP AutoKFD has been tested on Windows 8 and it is compatible with Windows 7 and Windows XP operating systems. Manage & Remove Dangerous Files VRCP AutoKFD enables you to scan for potentially dangerous files in removable storage drives, such as external hard disks, flash drives, USB drives, etc. Moreover, you can easily manage and remove these files. Review VRCP AutoKFD VRCP AutoKFD is a freeware application that enables you to automatically remove potentially dangerous files from removable storage drives.
