## Road Navigator Rn99 Software Download

Since I have had a "RoadNavigator RN99" for several months, which is basically... Navigator 12.x, wouldn't it be better to uninstall the Mireo software first. I use Mireo because of Jlink2 drivers and Jlink which I use to connect Garmin. Due to the use of Mireo as a navigator, I have a lot of files and would not like to delete map files. I'm using Windows Vista Ultimate and have the Jlink (and Jlink2) drivers installed on the desktop. I saw that you can use the GIS API, but I'm not sure how. Is there a way to uninstall the Mireo driver (and the Jlink2 driver) and use the Mireo with a Garmin navigation system?
