However, the time course of the changes of these  
parameters is not clearly determined. Our study  
has a number of limitations. First, the study size  
was small. In fact, we began this study to obtain a  
large sample size in the design of the phase II  
study, which is ongoing. Second, the number of the  
patients with poor renal function was small, so we

---

could not examine the impact of the urinary excretion rate of vancomycin on the pharmacokinetics of this drug. Further, the possibility of an interaction between vancomycin and caspofungin cannot be ruled out. The results of subgroup analysis showed that van
