That way, you have the best of both worlds — quick access to your image files with the power of an application. With an HTML5 File Viewer, you simply double-click an image file to open it and display it. You can edit the file directly within the browser, as shown in Figure 6-1. FIGURE 6-1: With an HTML5 file viewer, you can work with image files directly in the browser. You can find the HTML5 file viewer at ``. After you download the file viewer, install it on your computer. You can use it to open and view most image files. The web-based version of PowerPoint is simple to use. You simply insert a picture, and then start creating your slideshow. To work with the web version of PowerPoint, you must have a Windows account. Even though you can create a slideshow by using the Web version of PowerPoint, you must then use a Windows application to view the slideshow. Use PowerPoint while you are on a Windows machine to view your slideshow. # SOUND Sound is an area of technology that has continued to improve and grow with the rest of the web. The Web Audio API (covered in Chapter 12), HTML5 Web Speech API (covered in Chapter 14), and several other Internet technologies enable you to add sound to your web pages. You can listen to the sound just as you would a sound file on your hard drive. Some things to consider when dealing with sound in HTML5: *

The bigger the file size, the longer it takes to download the file from the internet. Larger images also take up a lot of space on your computer or mobile device. The smaller the size, the more you can fit on a single screen. The pixel size of your image can be adjusted using the Image Size tool from the tools menu. Some applications, like Microsoft Office 2019, come with their own image tools. However, these tools lack some important features and are usually less powerful than Photoshop Elements. In these cases, you need to learn to use

You can also use "Save As" to save a copy of your images under a new name. Adjust the quality of an image using the Image Quality tool. The "Image" menu appears when you click the "Adjust" icon. From here, you can choose between the following settings: Open, Save, Restore, Undo, Redo and Help. The icons at the bottom of the "Image" menu enable you to adjust the following settings of your image: The Image Size tool.
