Since it is a free, minimalist application, you can download it very fast. Yet Another Picture Program runs as a standalone program or as a Windows service so that you do not need to install anything. YAP (Yet Another Picture Program) is simple, easy to use and very effective for reducing your photos' size without losing your

data and without damaging them. YAP can be used by anyone and has a great user interface. The program is very easy to use, even for beginners. YAP is capable of displaying multi-page photos, different images at the same time, and the program supports a wide variety of file formats including JPEG, BMP, GIF, PNG, EXIF, and TIFF. You can set the preview image in both portrait and landscape mode. It is possible to automatically rotate images. Another powerful feature allows batch renaming of photos.

Renaming options include: date, day, month, year, hour, minute, year, day, month time time and date time with no date words. In this mode, which is similar to the one provided by Windows, you can use words of your own choosing to replace the words in the original title or description. You can also use capital letters for the first letter of every word. These words are written in any combination of upper and lowercase letters. When you find a photo you like, you can quickly find and load it by using a b7e8fdf5c8
