In addition to photo editing features, Photoshop comes with a myriad of other tools. Here are some of the tools you may use: The Pen Tool allows you to make marks in an image. You can use it to draw lines, and you can also fill and stroke colors into the lines. You can also use the Pen tool to create shapes. The Eraser tool is used to remove or hide areas in an image. The Levels tool can be used to remove image noise, or other low-frequency variation. The History palette can

help you easily compare two or more versions of an image to see what was changed. The Magic Eraser tool can be used to remove unwanted objects from an image. You can use the Quick Selection tool to find and highlight areas in an image. The Pathfinder tool is used to correct overlapping objects in an image. The Orbit tool is used to move around an object in an image. The Eyedropper tool allows you to sample colors from an image. The Blur tool blurs an object. The Dodge and Burn tools allow you to darken or lighten an area in an image. The Sharpen tool

allows you to soften rough edges. The Healing Brush tool can be used to fix a few problems, such as a shadow or blur that is missing in an image. The Clone Stamp tool can be used to copy pixel-by-pixel areas of an image. It can also be used to remove things like dust and small scratches from an image. The Gradient tool allows you to fill an object or change the color of an object. The Gradient Fill tool lets you fill the inside of an object or change the color of an object. The Eraser Tool allows you to get rid of unwanted objects. The Specular tool

allows you to change the appearance of materials in an image. The Halftone tool can be used to change the appearance of lines and dots. The Paint Bucket tool allows you to fill an area with a color or texture. The Magic Wand tool can be used to find certain colors in an image. The Gradient Tool allows you to create gradient fills that change in color over time or distance. You can use the New Layer feature to create a new layer inside an existing layer. You can either edit the new layer and blend the

Q: Is it possible to rename `the.selectize-container` and `selectize-dropdown` elements for custom styled select boxes? I have a select box, and when I get data from the drop down, I am adding a custom css class to the dropdown. Is it possible to rename `the.selectize-container` and `selectize-dropdown` elements to something else? A: No. The widget only uses `selectize-container` and `selectize-dropdown`. It doesn't have any other. You'll need to re-make the widget. --TEST-- Test
