Hi, I made this bug, but it is not fixed and it never will be, so here I uploaded the crack. Thanks. autorun.exe not working I only found single configuration that works fine. On my other pc (Win7 x64) I have no issues, on Win10 on that pc and on my work pc (Win7 x64) I have no issues, but on my laptop (Win10 x64) it is not working. On all those 3 it is asking for a cd... I don't use a cd (I don't have a cd drive on my laptop), but I don't use autorun.exe at all. I have tried almost everything. Clean installation, repair installation, changing registry (the only difference is fixreg or reg with no-cd. I don't know what is the problem, but this is the first game that makes me actually want to buy a cd (I don't have one). Before this game I have always used cracking tools and posted them online, but this time I managed.exe that actually needs you to buy the game (and it is 32bits). games From The Pool I tried to put the game on a usb pendrive and use that one for the installation, but when I go to properties and check "allow this to run without a cd" the game starts. I think the only solution is to make an autorun.exe that grabs a patch and installs the game, and that is what I am going to do... Maybe I made some mistake, or maybe the patching itself is broken, or maybe (as I said) the game is 32bits and has to be 32bits. Hi, I am looking for a web developer to help me build my new website. I have 3 major requirements: - Design them according to my wishes - Install my games with patch and mouse-activated checkbox - The games can be updated, automatically - so I don't have to do the instal-update-reset each time The hosting for me is done, but I need someone to help me finish it. I hope we can work together and have a great project! I have a problem with download
