Visual LISP is a dynamic programming language designed for writing applications for AutoCAD. Visual LISP is a functional language, with limited control structure. For control structure see the Visual LISP article. VBA is a programming language for writing programs on the Microsoft Windows operating system. Visual Basic for Applications is a component of Microsoft Office. AutoCAD has a VBA API, which is supported by Visual Studio, and the standard Visual Studio Tools for Applications. AutoCAD Architecture AutoCAD Architecture is a third-party application that adds functionality to AutoCAD similar to that of the Autodesk Architectural Designer. This application was originally called Architect (software), but was purchased by Autodesk and renamed. AutoCAD Architecture can be used as a substitute to Autodesk Architectural Designer. The Architect Suite consists of five applications which work together and complement each other. AutoCAD Architecture Master Planner (ARCH-MP) is a drawing tool that creates, reviews and analyzes an AutoCAD project. The ARCH-MP design manager provides a consistent workflow throughout the entire design process. Architects and Autodesk staff can use the ARCH-MP design manager to create and review the project and provide the technical information required for building permits. The ARCH-MP design manager, drawing assistant, and ARCH-MP outputs report in the same PDF file. Designers can generate various reports, including the ARCH-MP 3D views, structural and geotechnical reports, section views, graph of the drawing and GIS reports. ARCH-MP 3D Viewer is an application that allows for the creation and viewing of three dimensional drawing files. It was formerly known as ARCH_Viewer. ARCH-MP 3D Viewer uses a patented 3D rendering technology, in addition to AutoCAD viewing and editing features. The rendering technology creates the 3D image from the original 2D design file, similar to how a designer uses AutoCAD to create the 2D design, and vice versa. The software uses a cloud computing approach, in which the design is stored in a database on a computer server, and rendered using a web browser. A license of the viewer is required to enable this capability. ARCH-MP Section Viewer is a tool that allows for the creation of 2D section views of 3D drawings. ARCH-MP Structural Report is a report that calculates structural, grading and af5dca3d97
